

*gift with taxes*

**estee slaughter**

**"america the bountiful"**

---

israel could not produce any of its distinctive products - ethnic cleansing, house demolitions, mass imprisonment, checkpoints, curfews - without **your** help. in addition to \$13 million dollars a day (recently increased from the president's war budget) of US tax money, we benefit from sale of weapons from companies like Lockheed Martin, investment of companies like Intel, McDonalds, Hewlett Packard, and of course the generous support of individuals through the Jewish National Fund and Israel Development Corporation. in fact our entire system of land expropriation and elimination of the native population was fashioned on your own. **estee slaughter** and the israeli government want to show our gratitude to the american people by offering this free\* gift: **The Apartheid Collection**. includes **Take It Away Total Village Remover, Bloody Hand Cream, Atrocity Cover Up** and **Kill Me Pink Lip Bomb**. in addition, for only \$99 you can get a special applicator brush made from real US-made M16 bullet shells salvaged from the bodies of refugee children in Jenin.

\* of course, it's not really free (just like the Palestinians won't be if the "roadmap" is completed). we'll just tack it on to our next request for an increase in foreign aid and loan guarantees from congress.
